ABOUT THE GOLF BUGGY GUY

Richard Bellia

Founder

My name is Rich Bellia, and I'm the founder of The Golf Buggy Guy. Prior to entering the world of golf buggies, I spent over 25 years in the events industry. When the pandemic brought the events sector to a sudden halt in 2020, I looked for new ways to stay active and contribute. What began as a small initiative—servicing residents' golf carts from my garage in Jumeirah Golf Estates, Dubai—quickly evolved into a full-scale business.

Today, The Golf Buggy Guy operates from three purpose-built facilities across the UAE. Our services now go far beyond basic repairs, and include:

- Short and long-term rentals for individuals, corporates, and large-scale events
- Complete fleet overhauls
- Annual maintenance contracts for corporate and residential clients
- Customization and performance upgrades
- On-demand repair services
- Sales of new golf carts

Customer service remains the cornerstone of our business. I am deeply passionate about exceeding clients' expectations and ensuring our clients always come first.

Drawing on my background in event management, I launched our rental division in 2023. Following a highly successful first year, we made a significant investment to expand the fleet in 2024. For the 2025/2026 season we are proud to be launching our rental operations in Saudi Arabia, along with the addition of 150 state-of-the-art, super-premium carts to our offering. We now manage a fleet of over **550 vehicles**, in a variety of configurations to meet diverse client needs.

All new carts are:

- **Powered by high-performance lithium batteries** for faster charging and extended range
- **GPS-enabled**, offering real-time tracking and operational control
- **Equipped with solar panels**, supporting your organization's ESG commitments
- **RFiD keys** to Group users and buggies for operational efficiency and control

My experience in the events sector has shaped our unique approach—not just supplying carts, but delivering a complete, dependable, and hassle-free mobility solution tailored to the demands of your event.

Our dedicated team is on hand to support you every step of the way, and we very much look forward to the opportunity to work with you.

JJ Trichardt
Founder and Managing Partner

Andy Fulcher
Partner and Technical Director

All Event Services (AES), have been raising the bar in temporary structures for music, sports, cultural, and business events across the Middle East since 2022. With over 4,000 projects delivered, AES are known for safety, customisation, and unforgettable experiences; from staging and seating, to bespoke structures, overlays, and scenic and engineering solutions. Learn more at www.alleventservicesgroup.com

The whole AES family, together with JJ and Andy, are delighted to partner with The Golf Buggy Guy, to drive events forward. By combining AES's world-class structures with TGBG's sustainable, premium golf buggies, we're ensuring seamless event flow, reduced environmental impact, and flawless delivery from first setup to final applause.

Together, we're on course to set a new standard, driving efficiency, sustainability, and impact straight down the fairway of every event.

ABOUT OUR RENTAL FLEET

We offer a fleet of over 550 carts available for rent, catering to both your front and back-of-house requirements so we are able to act as a "One Stop Shop" for the smallest to largest events in the UAE. Our diverse models are suitable for transporting VIPs or moving larger volumes of guests. We provide a full range of back-of-house options, including flatbeds for bulky items, cargo carts, ambulances, special needs carts, housekeeping, food and beverage carts, and more. Additionally, for event set-up, we offer a range of mules in both two and four-seater formats.

We have invested heavily in our fleet to be able to offer your event the latest carts featuring unrivalled features which include:

- Large capacity lithium batteries that provide extended run times and fast 4-6 hour re-charging to ensure your fleet is kept on the move
- Solar panels to augment the lithium batteries and add a significant statement on your ESG commitment
- GPS tracking that warns you on low battery charge levels and to geo fence areas of the event you don't want the cart to go and to locate missing carts quickly and easily
- RFIID keys to allow you to identify the driver and group buggies to users, i.e. housekeeping keys will only operate housekeeping buggies

For larger events we can provide an on-site team to maintain your carts during your event to give immediate support if it's needed and to ensure your rental carts are up and running when they are needed.

Our goal is not just to rent you carts but to offer solutions that simplify your operations.

PASSENGER CARTS

We offer an extensive range of carts suitable for both front-of-house and back-of-house operations. Our **DS models** are ideal for support and logistics roles, while our **premium Jett series** is designed for guest-facing transport.

For elevated experiences, we offer **The Falcon** and **Jett++** models—our ultra-luxury transportation solutions tailored specifically for your premium and VVIP guests.

Looking ahead, **Q4 2025** will see the addition of **100 brand-new Jett++ HR6 units** along with a number of **Jett++ HR4 models**, further strengthening our high-end offering.

All our carts are **meticulously maintained** at our in-house workshop, which includes **full bodywork and painting facilities**. This ensures every cart is delivered to your event in **first-class condition**, meeting the highest standards of presentation and performance.

REKKE LR4

The Rekke LR4 is our standard workhorse golf cart and is designed for transporting four passengers around your event. The rear seats feature a flip-back function, allowing for a flat-bed configuration to be utilized for ad-hoc equipment transport. These carts are well-suited for both front and back-of-house operations.

All our carts are equipped with **Advanced 150ah Lithium Batteries** for extended range and performance, **GPS Tracking & Access Control** to monitor and manage usage, **Integrated Solar Panels** for enhanced energy efficiency and **RFID Key Access** to enable user grouping and secure operation.

UTILITY CARTS

We offer a versatile range of utility vehicles (UTVs), from classic golf cart-style utility models to heavy-duty industrial Mules, available in both two- and four-seat configurations. In addition, we provide specialized units equipped with insulated storage, rubbish collection compartments, and enclosed cargo boxes—tailored to meet the operational demands of large-scale events.

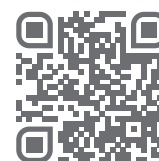

The TGBG UTV fleet includes both 2WD and 4WD models and features a selection of premium specifications such as air-conditioning, power steering, and enhanced suspension. These vehicles are ideal for event setup and breakdown, offering rapid and reliable transportation across large venues. Our electric UTVs can reach speeds of up to 55 km/h, ensuring efficient mobility without compromising environmental standards.

All vehicles are meticulously maintained in our fully equipped in-house workshops, including dedicated paint facilities, to ensure every unit arrives at your event in first-class condition, both mechanically and visually.

TRANSIT LR2C

The Transit LR2C is a Club Car Precedent with a cargo box. The Transit is an ideal cost-effective solution for your event set up and break down.

All our carts are equipped with **Advanced 150ah Lithium Batteries** for extended range and performance, **GPS Tracking & Access Control** to monitor and manage usage, **Integrated Solar Panels** for enhanced energy efficiency and **RFID Key Access** to enable user grouping and secure operation.
